POSITIONS OF RESPONSIBILITY

Internship Coordinator — Coordinated internship-related activities and communicated with students and relevant stakeholders.

Media & PR Manager — Managed media and public relations activities, including communication and promotional efforts for events and initiatives.

SKILLS

Programming Languages: C++, Python, JavaScript, TypeScript, SQL

Frontend: React.js, HTML5, CSS3, Redux, Zustand

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB, Neo4j, Redis

DevOps & Tools: Git, GitHub, Docker, Postman, Linux, AWS

PROJECTS

Indian Food Microbiome Database | PostgreSQL, Prisma, Node.js, Express.js, D3.js

- Designed a **relational microbiome database** with normalized schemas, referential integrity, constraints, and optimized indexing for complex biological datasets.
- Built a **taxonomy-aware data ingestion pipeline** integrating NCBI Taxonomy with validation, enrichment, retry handling, and caching.
- Developed **REST APIs and interactive D3.js visualizations** for structured querying and exploration of microbiome composition and taxonomy.

BleachVerse – AI-Powered Anime Lore Search Platform | Node.js, Express.js, PostgreSQL, Neo4j, Redis, Docker

- Built an **AI-powered semantic search platform** for natural-language exploration of the Bleach universe, enabling contextual discovery of characters, lore, and relationships.
- Architected a **polyglot backend** using PostgreSQL, Neo4j, and Redis for relational data, graph traversal, and high-performance caching.
- Developed modular **REST APIs** with input validation, security hardening, structured error handling, and automated integration testing.

Dynamic RBAC Team Management System | React, Node.js, Express.js, MongoDB, JWT, Socket.IO

- Built a **dynamic RBAC platform** enabling granular role creation, permission management, and resource-level access control.
- Implemented **real-time authorization updates** using Socket.IO for access-change notifications and dynamic permission propagation.
- Designed secure **JWT-based authentication and authorization** with controlled feature visibility and role-based resource access.

LeetCode Problem Tracker | React, TypeScript, Chrome APIs

- Built a **Chrome extension** that automatically detects LeetCode problems and submission verdicts while tracking solving history and progress.
- Developed a persistent **To-Solve workflow** and real-time Side Panel dashboard using Chrome runtime messaging and local storage.
- Implemented **DOM/network observers and analytics** for difficulty-wise and historical performance tracking.

Auto Copy – Privacy-First Chrome Extension | JavaScript, Chrome APIs, Manifest V3

- Built a **privacy-first Chrome extension** that automatically captures selected text, maintains clipboard history, and supports keyboard shortcuts and site-level controls.
- Implemented **debounced selection monitoring, background processing, and persistent Chrome Storage** to deliver responsive and reliable text capture.
- Designed a **local-first architecture** with no external tracking, keeping captured data entirely within the user's browser.

EXTRACURRICULAR

Novartis Hackathon : Participated in the hackathon, collaborating with a team to develop a solution within the given timeframe.

INTERNSHIP

Full Stack Developer Intern — Rengy Pvt. Ltd.

- Developed and enhanced **full-stack web applications** using React, TypeScript, Node.js, Fastify, and MongoDB.
- Built **scalable REST APIs and microservices** for enterprise business workflows.
- Optimized database queries and API performance, achieving **~40% reduction in response latency**.
- Implemented reusable **search, filtering, sorting, validation, and role-based access** features.
- Automated **document generation, notifications, and background workflows** to streamline operations.
- Collaborated on **deployment, debugging, code integration, and production support** across multiple services.
